Per- and PolyFluoroAlkyl substances (PFAS) declaration:

Per- and polyfluoroalkyl substances (PFAS) is a family of more than four thousands of synthetic chemicals that are used in many application fields. However, they have been founded toxic for both humans and wildlife. Many PFAs are already included in the SVHC list under REACH regulation (EC) 1907/2006.

We declare that we are compliant with current regulations that control PFAs uses and we follow closely the project of restrictions of PFAs by the European Chemical Agency (ECHA).

For the time being, there are currently no legal obligations to disclose information on the potential presence of PFAs in our products. The investigation among our suppliers is ongoing and in case of a future PFAS regulation, HagerGroup will comply with new requirements.

Sincerely,

Obernai, 2nd of May 2023

Guillaume GRUN
Environment Standardisation Engineer
